

#### 8-channel bridge amplifier for multi-channel, dynamic strain gauge applications

The B(C)-8 is a DC bridge amplifier with 8 differential analog inputs of higher bandwidths allowing the measurement of:

- Voltage and current (20 mA)
- Stain gauges, bridge sensors
- IEPE/ICP sensors (with optional DSUB plug)

For powering external sensors or bridge measurements, a software selectable sensor supply is integrated.

#### **Highlights**

- Very high signal bandwidth of up to 48 kHz
- $\bullet$  Software selectable quarter-bridge completion between 120 and 350  $\Omega$
- Graphical configuration wizard to set strain gauge bridges
- Supports imc Plug & Measure (Transducer Electronic Data Sheets)
- Also available with compact, high-density DSUB terminal connections (variant "C")

CRFX/B-8 (Fig. similar)

#### **Typical applications**

• strain gauge, load cells, pressure sensors and universal voltage measurements with higher bandwidths

#### imc CRONOSflex - Frameless expansion, flexible modularity

The imc Click Mechanism and extruded aluminum case provide a firm mechanical and electrical connection. As a result, no mainframe or rack is needed.

An imc CRONOSflex system uses EtherCAT as an "internal" system bus for connecting various modules to the main base unit (CRFX-400 / CRFX-2000G). With the system bus, all imc CRONOSflex modules are guaranteed to be synchronized with each other. This allows various modules to be either connected in one central block or connected via standard network cable in a spatially distributed system.

imc Click Mechanism

Alternatively, connection can be made by means of standard Ethernet cables (RJ45, CAT5), thus creating a spatially distributed system.

CRFX distributed system

#### Overview of available variants

| Standard version |             | ET-version * |  |
|------------------|-------------|--------------|--|
| Order Code:      | article no. | article no.  | remarks                                |
| CRFX/B-8         | 11900023    | 11910013     | with DSUB-15 sockets                   |
| CRFX/BC-8        | 11900024    | 11910014     | with DSUB-26-HD (high density) sockets |
| CRFX/B-8-L       | 11900xxx    | 11910088     | with LEMO sockets                      |

rear view of the BC-8

#### **Module power supply options**

- Direct connection (LEMO.EGE.1B.302 power socket)
- Adjacent module (module connector / imc Click Mechanism)
- EtherCAT network cable: Power over EtherCAT (PoEC)

For further details refer to the power options documentation.

### **Technical Data Sheet**

| Block isolation           |                        |   |  |  |
|---------------------------|------------------------|---|--|--|
| Parameter                 | Value                  | Remarks   |  |  |
| Block isolation           | 60 V                   | all internal electronics isolated from the housing (CHASSIS, PE)      |  |  |
| Isolation impedance       | 500 kΩ    1 nF         |   |  |  |
| Internal reference ground | -VB, GND, TEDS_GND     | all channels with one common, galvanically connected reference ground |  |  |
| External reference ground | CHASSIS, metal housing | internal electronics as an entity, galvanically isolated from housing |  |  |

Block isolation for improved suppression of ground loops and related interference. Does not constitute channel-wise individual isolation. Not rated nor intended for safety of equipment and personnel.

Devices or modules purchased before ca. 2012 do not feature block isolation.

| Power supply               |                 |   |  |  |
|----------------------------|-----------------|---|--|--|
| Parameter                  | Value           | Remarks   |  |  |
| Input supply voltage       | 10 V to 50 V DC |   |  |  |
| Power consumption          | 10 W            | 10 to 50 V DC                                       |  |  |
|                            |                 | incl. 120 $\Omega$ 5 V load to all channels         |  |  |
| Isolation                  | 60 V            | nominal isolation specification of the supply input |  |  |
| Power-over EtherCAT (PoEC) | 42 V to 50 V DC | supply via EtherCAT network cable                   |  |  |

| Terminal connections of the module |                 |  |  |  |
|------------------------------------|-----------------|--|--|--|
| Parameter                          | Value           | Remarks  |  |  |
| EtherCAT connection                | 2x RJ45         | system bus for expanded imc CRONOS <i>flex</i> components    |  |  |
| Input supply plug (female)         | LEMO.EGE.1B.302 | multicoded 2 notches, for optional individually power supply |  |  |
